

# Build a vibrant, **Learning Possibilities**

## connected learning community

Use the LP+ e-learning platform to help your learning community realize its fullest potential

Learning Possibilities provides a portfolio of proven, broad technology solutions and services which meet the needs of learning communities – from country-wide education systems to individual educational institutions – and which contribute to raised standards and more effective schooling.

Our LP+ e-learning platform connects your learning community 24/7 and eases manageability through a fully hosted, affordable, pay as you grow model. Communication tools increase administrative efficiencies; collaboration and networking applications engage learners through educationally relevant interfaces; easy to use high-quality teaching and learning tools drive creativity; and dynamic reporting portals engage parents. In a highly secure and private cloud, LP+ removes the overhead of infrastructure costs and management whilst retaining flexibility. LP+ offers an integrated e-learning platform to facilitate growth of a vibrant learning community.

### The LP+ e-Learning Platform

#### Connecting your community

Parents are engaged in the school community and to support their child's learning whilst students and teachers have access to collaboration technologies enabling them to research, create and share learning across their school – and beyond.

#### Increasing creativity in the classroom

LP+ provides learners with secure and contemporary ways to learn, question, share ideas, broadcast knowledge and follow personalized learning paths. Content creation and management tools make it easy for teachers to create their own SCORM-compliant eLearning materials and assign them to students – from any mobile or internet-connected device.

#### Doing more for less

Schools using the LP+ platform are able to recover the cost of the learning platform. An independent research study shows how schools using the LP+ platform were able to achieve an ROI of 8x. Built on enterprise-level technology, LP+ offers lower costs and more efficient ways of working without compromise on security or stability.

#### Realizing your fullest potential

Password-protected, single sign-on ensures that students access the right courseware and content. Teachers are able to work effectively and deliver engaging classes with integrated search making it easy to locate lessons, class materials or learning content.

#### Supporting technology adoption

As winners of the prestigious BETT ICT Education Partnership Award, and author of LP+ ADOPT, the basis of the UK national framework for learning platform adoption, Learning Possibilities is recognized as a leader in technology adoption for the sector.

### Benefits

#### Engage parents and community

Open new opportunities for parents and families to view reporting to support their child's education - and participate in your school community. Let your teachers join our community of 50,000 others collaborating online.

#### Support your students through diverse ways to learn

Engage your students with interactive tutorials and animated courseware – delivered in their style, at their pace...anytime, anywhere.

#### Save money and time

Access LP+ with zero capital costs, no maintenance overheads and flexible pay as you go payment plans, whilst deriving significant cost and time efficiencies.

#### Use our award-winning model for technology adoption

Our industry leading, award-winning adoption framework aligned to school improvement plans and school self-evaluation frameworks gives a tangible return on investment.

Join our family of vibrant, connected learning communities...
